

NEW STUDENT'S CHECKLIST

This list helps you to check you haven't missed the most important from the website www.xamk.fi/new-student! See detailed instructions on the website.

- Confirm the study place and enrol as student by 17 July 2020 (3 pm) (note changed date)**
The link for enrolment appears on the screen after you have accepted the study place bindingly.
Postponing the beginning of your studies: deliver documents proving the legal grounds for your non-attendance [through Xamk's electronic service](#) by the same deadline. To qualify for the Early Bird scholarship at Xamk, follow your personal deadline to confirm the study place.
- Make sure you have uploaded the qualification certificates used for applying to your application form on Studyinfo by 17 July 2020. In addition, original certificates and translations are checked in the beginning of studies.**
You may not need to submit certificate copies either because information about the qualification completed in Finland is verified from the national database or the certificate copies have been submitted already during the application period. Please check the detailed instructions on [new student's website](#)!

The student selection is conditional until the person admitted has presented the original certificates and these have been verified by checking the copies against the original certificates.

- Arrange your student accommodation**
You are advised to submit the application to the student housing agency as soon as you have received the admission letter. There are also options for short-term accommodation.
- Have your own laptop ready for the studies**
Check the university requirements for the device. In addition, familiarise yourself with the instructions for obtaining the student user name. Only students in Game Design do not need their own laptop in studies.
- Check the time and place for beginning the studies and other programme-specific instructions**

In addition, students from outside Finland need to do the following:

- Pay the tuition fee by the given deadline, if required**
You are registered as a student only after having paid the tuition fee.
- Apply for a residence permit, if needed**
Prepare for the RP application by checking you have [all the necessary attachments and information before you begin](#). Begin the application online at Enterfinland.fi. See further instructions on [new student's website](#) and follow the updates on [the Finnish Immigration Service's Corona](#) page.
Request a Finnish personal ID code to be issued with your residence permit!
- Have the health examination done by a medical professional (doctor) in your home country and bring the health certificate with you in the beginning of studies.**
The health certificate is required from foreign students who study on Xamk campuses.
